Soy Protein Ingredient Suppliers

Grown sustainably by U.S. farmers, the protein from soybeans delivers more protein per hectare than any other crop. Soy is a complete high quality protein and one of the few widely available sources of plant protein that provides all essential amino acids in appropriate amounts to meet the needs of children, as well as adults.

Organic Supplier

Visit **Food.USSoy.org** to learn more about U.S. grown soy protein, high oleic soybean oil and shortening.
